

CLOTHES RECYCLING WORKSHOP

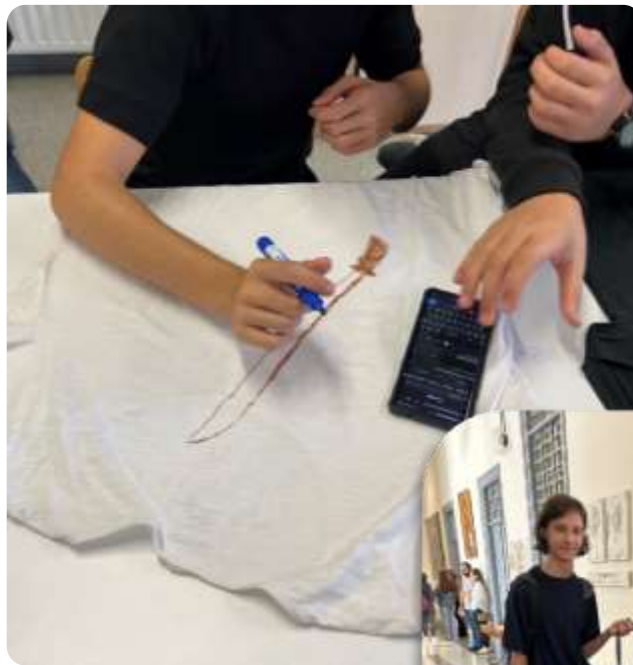

What we did ?

- We brought with us old clothes that we didn't need.
- They gave us some ideas about how we can make our old clothes more stylish and give them a second life.
- They showed us how we can make an old t-shirt into a tote bag and a lot more.
- We saw a video about how fast fashion is harmful to the environment.
- At the end we showed our work to the people in charge.
- We finished our workshop by doing our own fashion show .

Some
pictures :

The videos that
we saw:

What we learned ?

- How to reuse our clothes by making something different like bags or making changes to our clothes to wear them again.
- How much energy is being used to produce fast fashion clothes.
- The importance of recycling old clothes and giving them a second life while also utilizing our creative and artistic side.

Our project is clothing
recycling

-
- The project started by the idea of taking old clothes, that were supposed to go to the trash, reuse them and make something new.
 - We found a lot of ideas, but one caught our attention
 - So, we decided to use the old clothes and make dolls

So, we collected
some recyclable
materials, and we
combined them
with the old clothes

Our work course

And we ended up with these results

During our project of recycling clothes and doll creating, we visited a workshop.

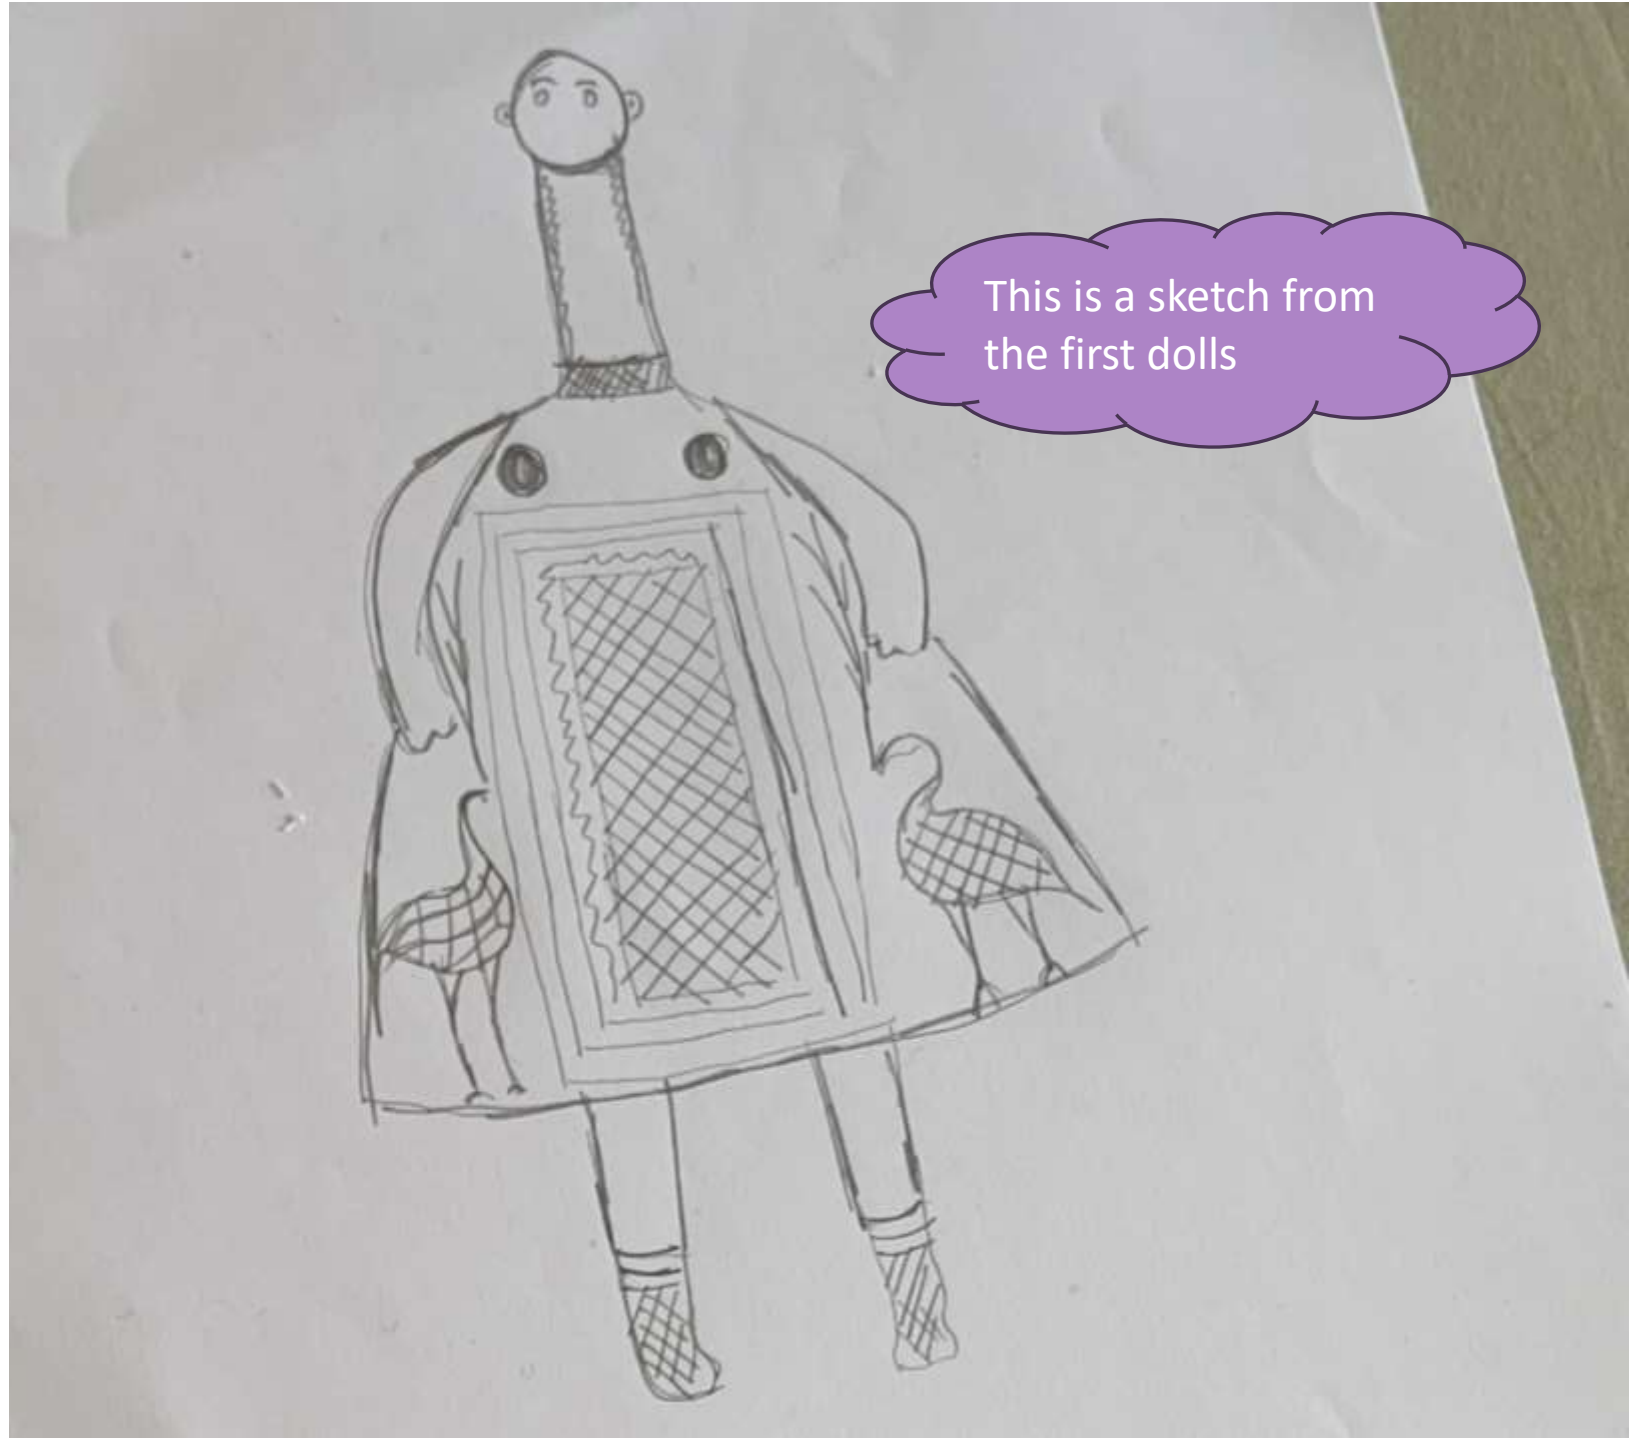

There, the owner makes dolls professionally, using clothes and fabric

THE DOLL WORKSHOP

There, we learned about:

- The history and the evolution of dolls
- How people made dolls in the past
- How she makes the dolls

These are some examples of the dolls she made
