

# STORY TELLING

---

We use a program called “Story Jumper”, which allows people to work simultaneously on the book

# THE GOAL OF THE BOOK

The purpose of this book is to educate and convince people that harming the environment is going to cause a variety of huge problems, which are likely to damage them and the wildlife.

# THE GOAL OF THE BOOK

---

This book is also written to inform people about the problem of human in caution, that can lead to forest arsons and sea contamination.

The sea pollution is mainly due to:

- Litter thrown by people on a visit to the beach.
- The garbage thrown by the cafes and restaurants located on the beach
- the oil cylinders left by the ships
- Plastics that fall into the sea and marine animals eat them and drown
- the sewage that falls into the sea from restaurants, cafes and ships

## ABOUT THE BOOK

Students of our school create a tale about a hot air balloon visiting destroyed places that normally would be astonishing landscapes.

The fire in the forest usually starts by:

- Really high temperatures in the summer
- Discarded cigarettes
- Lightnings
- Unattended campfires

## ABOUT THE BOOK

This book explains how the environment is affected in a negative way, by presenting the factors and the consequences of pollution, such as air quality degradation by the constant actions of factories.
